Close Up And Macro Photography

Close-Up and Macro Photography is a brilliant resource but only really offers a little for those who have been taking photos for a while. I'm a completely self-taught amateur photographer and I, personally, only found helpful info in the chapters on lighting and camera supports (hence my rating of only 3 stars).

Close-Up and Macro Photography (The Focus On Series ...

When it comes to exploring macro and close-up photography, the good news is that anyone can participate. While a DSLR camera is preferred for close-up work, using a compact camera can be just as rewarding.

Close-Up and Macro Photography Tips - PictureCorrect

Remember that close-up photography is a blanket term for regular close-ups, macro, and micro photography. Close-up means you're just shooting at a short distance from the subject. You can use virtually any lens to achieve close-up photos. Macro means you're taking super close-ups of objects at 1.1.

Close-Up Photography vs Macro vs Micro (What's the Difference)

The basic set-up required for close-up photography apart from the obvious camera body is a lens with macro capabilities. These macro-capable lenses can come in the form of a (short/long) tele-photo lens with a close-up "filter", a standard zoom lens with macro mode settings or a specialized Micro Nikkor macro lens.

Beginner's Guide to Close-up & Macro Photography

Although often applied to closeup photography in general the term "macro," (from the Greek makrós, meaning, ironically, "large," "long," "great," or "excessive") is used specifically to describe a...

Up Close and Personal with Macro Photography | by Dreux ...

Macro photography is in essence close up photography as well. However, close up photography is not always considered as true macro photography. For example, if you have a lens that is NOT considered a real macro lens, yet offers a macro setting (as many do nowadays), this is usually referred to as being close up photography, and not true macro.

Difference Between Macro Micro and Close Up Photography ...

Close-up photos of flowers can make for interesting colours and shapes There is something magical about seeing a subject up close and personal. This opens up a whole new world of options for you as a photographer. Close-up photography, or macro photography, can be a very rewarding form of photographic expression.

Getting Started Guide to Macro or Close-Up Photography

With close-up, you can shoot it with most lenses, you get very close to your subject with a zoom or by walking closer but can still tell what it is without question and you can do it successfully with a moving subject. The two images above, shot in Costa Rica in 2012, were taken with the 100 mm Canon macro lens.

MACRO VS. CLOSE-UP PHOTOGRAPHY

The camera lens you use is the real defining difference between close up and macro photography. Anyone can take a close-up picture, such as with a telephoto lens. But generally, macro photography can only be created with a macro lens. These pricy lenses allow you to capture the detail of an insect's head, or the texture of a flower petal.

Knowing the Difference Between Macro, Micro, and Close-Up ...

Close-Up Photography Although some people see these as being the same thing, or at least similar, there is a difference. Macro photography is capturing something small and making it look larger than life. Close-up photography is getting closer to a specific subject.
