by Ryan Bauer. socket wrench image by Jim Mills from Fotolia.com. The Mazda 6's engine light is designed to quickly alert the driver to failing drivetrain components. When the light comes on without reason, or refuses to turn off after the problem has been repaired, a manual reset is required. Since the light is controlled by the computer system, momentarily disconnecting the power supply will turn the light off, delete all stored error codes, and restore the system to a factory state.

### How to Reset a Mazda 6 Engine Light | It Still Runs

To fix the problem with your DPF light, you'll need to call our booking team on 01405 744 185 or book online on our car service page. In terms of the DPF light also acting as a reminder to have your Mazda 6 serviced, that would be true in the sense that you may have an issue with your DPF that needs attention, so a service would be the obvious course of action.

hi there, 2009 mazda 6 saloon has starting showing flashing dpf light on dash. Never had issue with dpf or dpf light before. what's going on? i do at least 350 miles per week, and 85% of these on motorway. I've already read the manual and i know that it says to take it to an authorised dealer asap.
