Download Free Php Web Services Apis For The Modern Web

Web service supports only HTTP protocol whereas API supports HTTP/HTTPS protocol. Web service supports XML while API supports XML and JSON. All Web services are APIs but all APIs are not web services.

API vs Web Service: What's the Difference?

In this section, we will add a simple client application (a command line script using curl) to test the REST API. We'll create a new php file 'public/clients.php' with a very simple flow: it will retrieve the Okta details (issuer, scope, client id and secret) from the .env file, then it will obtain an access token from Okta and it will run API calls to get all users and get a specific user (passing the Okta access token in the Authorization header).
