Using Pivot Points for Predictions -

File Type PDF Pivot Point Trading Your Step By Step Guide To Profitable Day **Investopedia**

First, traders start with a base pivot point. That's the average of high, low, and close from a previous period. Below is the complete calculation for standard pivot points. To calculate the Base Pivot Point: $(P) = (High + Low + Close) / 3$
calculate the First Support Level:
Support 1 (S1) = $(P \times 2) - High$.

previous trading session's high, low and close. By applying a set of formulas to the Pivot Point, additional levels of both support and resistance are calculated. These levels are commonly known amongst traders as R1, R2, R3 and S1, S2, S3.

Ultimate Pivot Points™ - User Guide

File Type PDF Pivot Point Trading Your Step By Step Guide To Profitable Day Trading With Pivot Points

The pivot point indicator is a system of many horizontal lines that represent important price levels based on the price data of the preceding trading session — the previous day, week, or month. Traders use those levels in many ways, including finding potential entry levels, setting stop losses and profit targets, and gauging price movements.
