Software Reverse Engineering – Software Reverse Engineering is the process of recovering the design and the requirements specification of a product from an analysis of its code. Reverse Engineering is becoming important, since several existing software products, lack proper documentation, are highly unstructured, or their structure has ...

Software Engineering | Software Maintenance - GeeksforGeeks

One distinguishing feature of software engineering is the paper trail that it produces. Designs are signed off by managers and technical authorities, and the role of quality assurance is to check the paper trail. Many software engineers admit that their job is 70% paperwork and 30% code. It's a costly but responsible way to write software ...
