NASA Langley's Systems Analysis and Concept Directorate investigates the feasibility of creative and forward-thinking ideas. Many concepts are pursued and eventually actualized while others, like HAVOC, are added to NASA's archives. All our research adds to NASA's body of knowledge and furthers the Agency's mission.

The goal of this book is to allow you to begin with a "blank sheet of paper" and design a space mission to meet a set of broad, often poorly defined, objectives. You should be able to define the mission in sufficient detail to identify principal drivers and make a preliminary assessment of overall performance, size, cost, and risk.

Basic Steps in Designing a Space Mission

Overview. This famous and practical handbook for Space Mission Engineering draws on leading aerospace experts to carry readers through mission design, from orbit selection to ground ops. SMAD III updates the technology, provides greater emphasis on small spacecraft design and the cost-reduction process, and includes more detail on multi-satellite manufacturing, space computers, payload design and autonomous systems.
